

Ignacio Ten

INDUSTRIAL ENGINEER | DATA ANALYST & INDUSTRIAL AUTOMATION ENGINEER.

IIndustrial Engineer specializing in the development of artificial intelligence solutions, advanced analytics, and automation applied to asset management. Currently working at Enagás, contributing to agentic AI projects for the analysis and optimization of industrial maintenance plans, as well as enterprise digital solutions built on Microsoft Power Platform.

EDUCATION

2024 -PRESENT QUALIFYING MASTER'S DEGREE IN INDUSTRIAL ENGINEERING
Universitat Politècnica de València (UPV)

2020 - 2024 BACHELOR'S DEGREE IN INDUSTRIAL TECHNOLOGIES ENGINEERING
Universitat Politècnica de València (UPV)

2024 - 2024 MASTER'S IN AI & INNOVATION
Founderz

EXPERIENCIA

2026-PRESENT
DATA ANALYST - ENAGÁS TRANSPORTE

- Development of agentic AI solutions applied to industrial maintenance, optimizing maintenance schedules and plans.
- Design of specialized agent architectures.
- Optimization of semantic models and reports in Power BI, reducing capacity consumption by up to 98% in terms of time and cost.
- Development and evolution of maintenance management dashboards, featuring information tailored for both technical teams and executive levels.
- Process automation using Power Platform, developing solutions that impact the capture, transformation, validation, and utilization of maintenance data.
- Architected scalable, analytics-ready data models

2025-2026
DATA ANALYST - ENAGÁS GTS

- Coordinated and executed the annual hydrogen injection capacity allocation process across the national gas grid, ensuring full compliance with current regulatory frameworks.
- Designed and implemented low-code solutions targeted at streamlined process automation.
- Applied artificial intelligence tools to drive innovation and continuous operational improvement.

IDIOMAS

Castellano | Native English | Advanced

HABILIDADES

ARTIFICIAL INTELLIGENCE & ADVANCED ANALYTICS:

- **Frameworks & Architectures:** Agentic AI (Multi-Agent Systems), Copilot Studio.
- **Analytics & BI:** Power BI (Advanced DAX, semantic model optimization, Fabric/Premium capacity management), Data Modeling (star/snowflake schemas).

AUTOMATION & LOW-CODE / CLOUD ECOSYSTEM:

- **Power Platform:** Power Automate (Cloud flows), Power Apps, Dataverse.
- **Integration & Data:** ETL pipelines, data lineage, and data governance.

CORE COMPETENCIES & SOFT SKILLS:

- Technical translation of plant/business requirements into scalable system architectures.
- Technical and executive stakeholder communication (C-level dashboards and reporting).
- Methodological rigor, analytical problem-solving, and continuous improvement mindset.
